Made of the purest granite stone

◀ 50 x 50 ▶

100% ANTIBACTERIAL

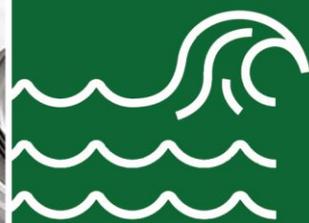

Granite sinks are mainly made of %80 granite and %20 acrylic or resin materials. In quality granite sinks materials are used that cover the entire sink like a protective layer that prevents damage to the sink. Different types of colors in granite sinks will help you achieve your desired decoration.

Unlike some sinks that leave traces of water stains on them granite has the property that almost no traces remain on it and it will not become cloudy over the years and remains as bright as the first day.
